Index to Volume 1

Abnormalities in blood clotting, in liver disease, 379
Absorption, fat, 98
Adlersberg, David: Electrophoresis and Monomolecular Layer Studies with Serum Lipoproteins, 18
Akerson, Irving B., see Gottfried, S. P.
Albumin, serum, denaturation of, 181
American Board of Clinical Chemistry, 137, 277
Amylase: Turbidimetric method, 159
A New Journal: Appleton, H. D., 1
A Note on Quantitative Urobilinogen Determinations: Balikov, B., 264
Anderson, J. T., see Keys, A.
Appleton, Harold D.: A New Journal, 1
A Practical Manual of Medical and Biological Staining Techniques: Gurr, E. (Book Review), 81
Arginase: Blood, method, 110
Balikov, Bernard: A Note on Quantitative Urobilinogen Determinations, 264
Becker, E., see Friedman, M. M.
Beer's Law: for stained protein patterns on filter paper, 329
Beher, W. T., see Gaebler, O. H.
Berger, Eugene Y.: Calcium Determination in Biologic Material, 249
Bile-pigment metabolism, 391
Bischoff, Ernst, Award, 72, 346, 423, 424
Bluemle, Dolores B., see Singer, R. B.
Bossak, E. T., see Adlersberg, D.
Brown, Herman, see Samson, M.
Brown, Ray K.: Serum Lipoproteins, Chemical and Enzymatic Studies, 83
Butt, Arthur J., see Leonard, R. H.
Calcium: EDTA method, 125: cerate oxidimetry method, 250
Calcium Determination in Biologic Material: Berger, E. Y., 249
Calculi, Quantitative method for urinary, 241
Cannan, R. Keith: Proposal for the Distribution of a Certified Standard for Use in Hemoglobinometry, 151
Carbohydrate metabolism in liver disease, 359
Carbon Monoxide, blood, micro-method, 170
Cell Volume, Blood, micro-method, 299
Cephalin-Cholesterol Flocculation Test, 377
Chemical Abnormalities in Blood Serum Associated with the Carrier State of Viral Hepatitis: Reinhold, J. G., 3
Chemical Evaluation of the Functions of the Liver, (Revised): Reinhold, J. G., 351
Chemical Physiology of Liver Disease, 358
Chemotherapy of Infections: Collier, H. O. J., (Book Review), 81
Cholesterol: Determination with p-toluenesulfonic acid, 345: Effect of Diet on blood, 34
Clinical Chemistry in Practical Medicine: Stewart, C. P. and Dunlop, D. M., (Book Review), 80
Clinical Significance of the Magnesium: Calcium Ratio; Technic for the determination of Magnesium and Calcium in Biologic Fluids: Friedman, H. S. and Rubin, M. A., 125
Coco, S., see Mason, W. B.
CO_2 Content, micro-determination, 293
Code of Ethics of the American Association of Clinical Chemists, 203
Colorimetric Determination of Blood Arginase: Friedman, M. M. and Becker, E., 110
Convenient Apparatus for the Continuous Dehydration of Histologic Material: Nadeau, G. and Joly, L. P., 190
Cooper, Gerald E., see Mandel, E. E.
Copper and diseases of the liver, 387
Cross-Contaminator Exclusion Test for Dry-Ashing Determination of Protein-Bound Iodine: Samson, M., Brown, H. and Eichen, S., 269
De Lalla, L. S., see Brown, R. K.
Detoxification reactions of the liver, 387
Digestion, fat, 93
Di Mauro, S., see Gottfried, S. P.
Diseases of the liver and biliary tract, 354
Disturbances of water and electrolyte balances in liver diseases, 384
Effect of Shaking on the Accuracy of Salt

Fractionation Methods for Serum Albumin: Saifer, A. and Zymaris, M. C., 180
Effects of Diet on Blood Lipids in Man: Keys, A., Anderson, J. T., Fidanza, F., Keys, M. H. and Swahn, B., 34
Eichen, S., see Samson, S.
Electrometric pH Determinations: Theory and Practice: Bates, R. G. (Book Review), 149
Electrophoresis and Monomolecular Layer Studies with Serum Lipoproteins: Adlersberg, D., Bossak, E. T., Sher, I. H. and Sobotka, H., 18
Estimation of Hydrocortisone Secretion: Silber, R. H., 234
Estimation of Lipid Fractions of Blood Plasma; System Using the Allen Volumetric Method: Kibrick, A. C. and Skupp, S. J., 317
Fatty Acids: Blood, Iodine numbers, 324: Blood plasma, 320: Blood, thiocyanogen numbers, 324
Fidanza, F., see Keys, A.
Freeman, Monroe E: President's Address, 68
Friedman, Howard S.: Clinical Significance of the Magnesium: Calcium Ratio, 125
Friedman, Max, M.: Colorimetric Determination of Blood Arginase, 110
Friedman, Nathan, H., see Gottfried, S. P.
Gaebler, O. H.: Reproducibility and Validity of Sodium Sulfate Fractionation of Proteins in Plasma and Knee Joint Fluid, 105
Galpin, R. R., see Gaebler, O. H.
Gordon, B. S., see Klein, B.
Gorsuch, T. L., see Mandel, E. E.
Gottfried, Sidney P.: Serum Beta-Lipoproteins of Normal, Atherosclerotic and Lipemic Individuals, 253
Graef, I., see Klein, B.
Green, D. E.: Oxidation and Synthesis of Fatty Acids in Soluble Enzyme Systems of Animal Tissues, 53
Hemochromatosis: 118
Hemoglobin: cyanmethemoglobin standard, 153: method, 153
Hepatic tests: evaluation of, 8: on blood donors, 10
Hepatitis: 3
Hormone metabolism in liver disease, 382
Human Biochemistry: Kleiner, I. S., (Book Review), 82
Hydrocortisone: method for calculation of secretion, 235
Iodine and Thiocyanogen Numbers of the Fatty Acids of Blood Plasma: Kibrick, A. C. and Skupp, S. J., 324
Improved Methods of Analysis for Oxygen, Carbon Monoxide and Iron on Fingertip Blood: Natelson, S. and Menning, C. M., 165
Iron: Blood, micro-method, 172: tissues, 118
Iron Content of Tissues in Exogenous and Endogenous Hemochromatosis: Klein, B., Gordon, B. S. and Graef, I., 118
Joly, L. P., see Nadeau, G.
Jones, Betty Jo: p-Toluenesulfonic Acid, Cholesterol Determination, and Explosions, 345
Kauffman, D. L., see Brown, R. K.
Keys, Ancel: Effect of Diet on Blood Lipids In Man; particularly Cholesterol and Lipoproteins, 34
Keys, M. H., see Keys, A.
Kibrick, Andre C.: Estimation of Lipid Fractions of Blood Plasma, 317
Kibrick, Andre C.: Iodine and Thiocyanogen Numbers of the Fatty Acids of Blood Plasma, 324
Klein, Bernard: Iron Content of Tissues in Exogenous and Endogenous Hemochromatosis, 118
Laboratory Instructions in Biochemistry: Kleiner, I. S. and Dotti, L. B., (Book Review), 82
Laurence, D. J. R., see Rees, V. H.
Legal Medicine, Pathology and Toxicology: Gonzales, T. A., Vance, M., Helpern, M. and Umberger, C. J., (Book Review), 148
Legislation, Clinical Chemistry, 347
Leonard, Reid H.: Quantitative Identification of Urinary Calculi, 241
Lipids: Fractions in blood plasma, method, 318: in liver disease, 360
Lipids, The: Their Chemistry and Biochemistry: Deuel, H. J., Jr. (Book Review), 219
Lipoproteins: 18, alteration by enzymes, 86: beta, changes at 6.5° and 37.5°, 255: effect of diet, 34: in human disease, 26: in mammals, 22: preparation, 84: Monomolecular layer studies, 18
Magnesium: method for biologic fluids, 125

Mandel, Emanuel E.: Seromucoid in Hepatobiliary Disease, 221
Mason, W. Burkett: Purification of Chromium (VI) for Use in the PBI Determination, 117
Menning, C. M., see Natelson, S.
Monomolecular Layer Studies: Lipoproteins, 18
Moreland, Ferrin B., see Jones, B. J.
Nadeau, Guy: Convenient Apparatus for the Continuous Dehydration of Histologic Material, 190
Natelson, Samuel: Improved Methods of Analysis for Oxygen, Carbon Monoxide and Iron on Fingertip Blood, 167
Neutral Fats: plasma, 320
Nitrogen metabolism in liver disease, 364
Organic Analysis: Mitchell, J. Jr., Kolthoff, I. M., Proskauer, E. S., and Weissberger, A., (Book Review), 148
Oxidation and Synthesis of Fatty Acids in Soluble Enzyme Systems of Animal Tissues: Green, D. E., 53
Oxygen: blood micro-method for capacity and content, 166
Peralta, Oscar: Rapid Estimation of Amylase Activity of Serum by Turbidimetry, 157
pH: Blood micro-colorimetric determination, 288
Plasma proteins in liver disease, 368
Pope, R. H., see Gottfried, S. P.
Practical Clinical Biochemistry: Varley, Harold, (Book Review), 218
President's Address: Freeman, M. E., 68
Proposal for the Distribution of a Certified Standard for Use in Hemoglobinometry: Cannan, R. K., 151
Protein Bound Iodine, 117, 269
Proteins: plasma, 105: Knee joint fluid, 105
p-Toluenesulfonic Acid, Cholesterol Determinations and Explosions: Jones, B. J. and Moreland, F. B., 345
Purification of Chromium (VI) for use in the PBI Determination: Mason, W. B. and Coco, S., 117
Quantitative Identification of Urinary Calculi: Leonard, R. H. and Butt, A. J., 241
Rapid Estimation of Amylase Activity of Serum by Turbidimetry: Peralta, O. and Reinhold, J. G., 157
Recent Studies of Fat Digestion and Absorption: Reiser, R., 93
Recognition of Specialists in Other Fields: Turner, E. L., 196
Rees, V. H.: The Correspondence with Beer's Law for the Optical Density of Stained Protein Patterns on Filter Paper as a Function of Surface Protein Concentration, 329
Reiser, R., Recent Studies of Fat Digestion and Absorption, 93
Reinhold, John G.: Chemical Abnormalities in Blood Serum Associated with the Carrier State of Viral Hepatitis, 3
Reinhold, John G.: Chemical Evaluation of the Functions of the Liver (Revised), 351
Reinhold, John G., see Peralta, O.
Reproducibility and Validity of Sodium Sulfate Fractionation of Proteins in Plasma and Knee Joint Fluid: Gaebler, O. H., Beher, W. T., Sigler, J. W. and Galpin, R. R., 105
Rubin, M. A., see Friedman, H. S.
Saifer, Abraham: Effect of Shaking on the Accuracy of Salt Fractionation Methods for Serum Albumin, 180
Samson, Meyer: Cross-Contaminator Exclusion Test for Dry-Ashing Determination of Protein Bound Iodine, 269
Selection of procedures in liver disease, 403
Seromucoid in Hepatobiliary Disease: Mandel, E. E., Gorsuch, T. L. and Cooper, G. E., 221
Serum alkaline phosphatase, 390
Serum Beta-Lipoproteins of Normal, Atherosclerotic and Lipemic Individuals: Gottfried, S. P., Pope, R. H., Friedman, N. H., Akerson, I. B., and Di Mauro, S., 253
Serum iron in liver disease, 385
Serum Lipoproteins; Chemical and Enzymatic Studies: Brown, R. K., De Lalla, L. S. and Kauffman, D. L., 83
Sher, I. H., see Adlersberg, D.
Shohl, Jane, see Singer, R. B.
Sigler, J. W., see Gaebler, O. H.
Silber, Robert H.: Estimation of Hydrocortisone Secretion, 234
Simultaneous Determination of pH, CO_2 Content and Cell Volume in 0.1 ml. Aliquots of Cutaneous Blood; A Modification of the Shock and Hastings Technic:

Singer, R. B., Shohl, J. and Bluemle, D. B., 287
Singer, Richard G.: Simultaneous Determination of pH, CO_2 Content and Cell Volume in 0.1 ml. Aliquots of Cutaneous Blood, 287
Skupp, S. J., see Kibrick, A. C.
Sobotka, H., see Adlersberg, D.
Statistical Analysis in Chemistry and the Chemical Industry: Bennett, C. A., and Franklin, N. L., (Book Review), 81
Structure of the liver, 351
Sullivan, Michael X.: 1955 Ernst Bischoff Award, 346
Swahn, B., see Keys A.
The Correspondence with Beer's Law for the Optical Density of Stained Protein Patterns on Filter Paper as a Function of Surface Protein Concentration: Rees, V. H. and Laurence, D. J. R., 329
Thiocyanogen Numbers of Plasma Fatty Acids, 324
Thymol Flocculation Test, 376
Thymol Turbidity Test, 373
Turner, Edward L.: Recognition of Specialists in Other Fields, 196
Urobilinogen: erratum for page 265, 349: quantitative method, 264
Zymaris, M. C., see Saifer, A.

Contents

A New Journal — *Harold D. Appleton* — 1

Chemical Abnormalities in Blood Serum Associated with the Carrier State of Viral Hepatitis — *John G. Reinhold* — 3

Electrophoresis and Monomolecular Layer Studies with Serum Lipoproteins — *David Adlersberg, Elaine T. Bossak, Irving H. Sher, and Harry Sobotka* — 18

Effects of Diet on Blood Lipids in Man: Particularly Cholesterol and Lipoproteins — *Ancel Keys, Joseph T. Anderson, Flaminio Fidanza, Margaret Haney Keys, and Bengt Swahn* — 34

Oxidation and Synthesis of Fatty Acids in Soluble Enzyme Systems of Animal Tissues — *David E. Green* — 53

American Association of Clinical Chemists: President's Address — *Monroe E. Freeman* — 68

The Clinical Chemist — 72

Abstracts — 75

Book Reviews — 80

Serum Lipoproteins — *Ray K. Brown, Louis S. DeLalla, and Dorothy L. Kauffman* — 83

Recent Studies of Fat Digestion and Absorption — *Raymond Reiser* — 93

Reproducibility and Validity of Sodium Sulfate Fractionation of Proteins in Plasma and Knee Joint Fluid — *O. H. Gaebler, W. T. Beher, J. W. Sigler, and R. R. Galpin* — 105

Colorimetric Determination of Blood Arginase — *Max M. Friedman and Edythe Becker* — 110

Purification of Chromium (VI) for Use in the PBI Determination — *W. Burkett Mason and Santo Coco* — 117

Iron Content of Tissues in Exogenous and Endogenous Hemochromatosis — *Bernard Klein, Benjamin S. Gordon, and Irving Graef* — 118

Clinical Significance of the Magnesium:Calcium Ratio — *Howard S. Friedman and Martin A. Rubin* — 125

The Clinical Chemist — 134

Abstracts — 141

Book Reviews — 148

Proposal for the Distribution of a Certified Standard for Use in Hemoglobinometry — *R. Keith Cannan* — 151

Rapid Estimation of Amylase Activity of Serum by Turbidimetry — *Oscar Peralta and John G. Reinhold* — 157

Improved Methods of Analysis for Oxygen, Carbon Monoxide, and Iron on Finger-tip Blood — *Samuel Natelson and Carol M. Menning* — 165

Effect of Shaking on the Accuracy of Salt Fractionation Methods for Serum Albumin — *Abraham Saifer and Michael C. Zymaris* — 180

Convenient Apparatus for the Continuous Dehydration of Histologic Material — *Guy Nadeau and L. P. Joly* — 190

The Clinical Chemist — 196

Code of Ethics of the American Association of Clinical Chemists, Inc. — 203

Abstracts — 208

Book Reviews — 218

111
13

Seromucoid in Hepatobiliary Disease *Emanuel E. Mandel, Thomas L. Gorsuch, and Gerald E. Cooper* 221
Estimation of Hydrocortisone Secretion: Method of Calculation from Urinary-Excretion Data *Robert H. Silber* 234
Quantitative Identification of Urinary Calculi *Reid H. Leonard and Arthur J. Butt* 241
Calcium Determination in Biologic Material *Eugene Y. Berger* 249
Serum Beta-Lipoproteins of Normal, Atherosclerotic, and Lipemic Individuals: Changes in Concentration, Stability, and Mobility upon Incubation at 6.5° and 37.5°, as Determined by Paper Electrophoresis *Sidney P. Gottfried, Russell H. Pope, Nathan H. Friedman, Irving B. Akerson, and Salvatore Di Mauro* 253
A Note on Quantitative Urobilinogen Determinations *Bernard Balikov* 264
Cross-Contaminator Exclusion Test for Dry-Ashing Determination of Protein-Bound Iodine *Meyer Samson, Herman Brown, and Seymour Eichen* 269
The Clinical Chemist 273
Abstracts 278

Simultaneous Determination of *p*H, CO_2 Content, and Cell Volume in 0.1 ml. Aliquots of Cutaneous Blood: A Modification of the Shock and Hastings Technic *Richard B. Singer, Jane Shohl, and Dolores B. Bluemle* 287
Estimation of Lipid Fractions of Blood Plasma: System Using the Allen Volumetric Method *Andre C. Kibrick and S. J. Skupp* 317
Iodine and Thiocyanogen Numbers of the Fatty Acids of Blood Plasma *Andre C. Kibrick and S. J. Skupp* 324
The Correspondence with Beer's Law for the Optical Density of Stained Protein Patterns on Filter Paper as a Function of Surface Protein Concentration *V. H. Rees and D. J. R. Laurence* 329
p-Toluenesulfonic Acid, Cholesterol Determination, and Explosions *Betty Jo Jones and Ferrin B. Moreland* 345
The Clinical Chemist 346
Abstracts 350

Chemical Evaluation of the Functions of the Liver (Revised) *John G. Reinhold* 351
The Clinical Chemist 422
The American Association of Clinical Chemists: Program of the Annual Meeting 427
Index 429
